

STRAND PALACE HOTEL

Strand Palace Hotel is one of London's busiest hotels with over 90% occupancy throughout the entire year. As principle contractor, PAYE undertook an extensive 14 month external refurbishment of the listed terracotta facades which also included roof repairs and window replacement.

Following the successful completion of this contract PAYE was also awarded the main contract to renovate the extensive lightwells, cleaning and repairing masonry, windows, and metalwork.

During these involved works, the hotel remained open throughout the process, exemplifying how PAYE can work closely and safely with each and every client and in close proximity to the general public.
